

**John Jackovin**

John Jackovin has been an entrepreneur for over 15 years. He started his first company at the age of 24 by teaching himself how to program from a book and selling into some of the largest hardware distributors in the US. John led that company to many millions in revenue and profitability. John also started a window grille replacement company that allowed consumers to configure replacement grilles for any window shape from any window manufacturer. That business was later purchased by the fulfilling manufacturer in 2013. Recently John has combined his love of craft beer and technology into a new business, BREWD. BREWD creates software for craft breweries to help them streamline their operations and increase efficiencies.
